"I have known Seth since we were introduced back in 1992 when I was working at The National Institutes of Health in Washington, DC. Seth has been a great educator and insurance professional for myself, my family and the partners in my practice now located in New York City."

"Seth and his team have been an invaluable resource to me, my family and my medical practice. Until my disability that occurred in 2012, I had no idea how important having the right insurance carrier and advisor would be. Seth personally helped us with the purchase of my coverage and was there at claim time to help us through the process. He has been awesome to work with and would recommend him to any physician looking to start a Disability Income program of their own."

"I was introduced to Seth through my wife who was completing her Dermatological Residency back in 1996. Seth has helped her with quality disability income and life insurance products for both of us. In addition, he was able to provide guidance regarding a Group Long Term Disability program for my growing practice. Seth seems to always be available, day or night and we would recommend him to anyone."
